Brushed Crew

Quality, built in *before* production begins.

Many factories can sew. Fewer get the sample right the first time — and stay in sync with you throughout. That's where CPL is different.

01 In-house Sample Room

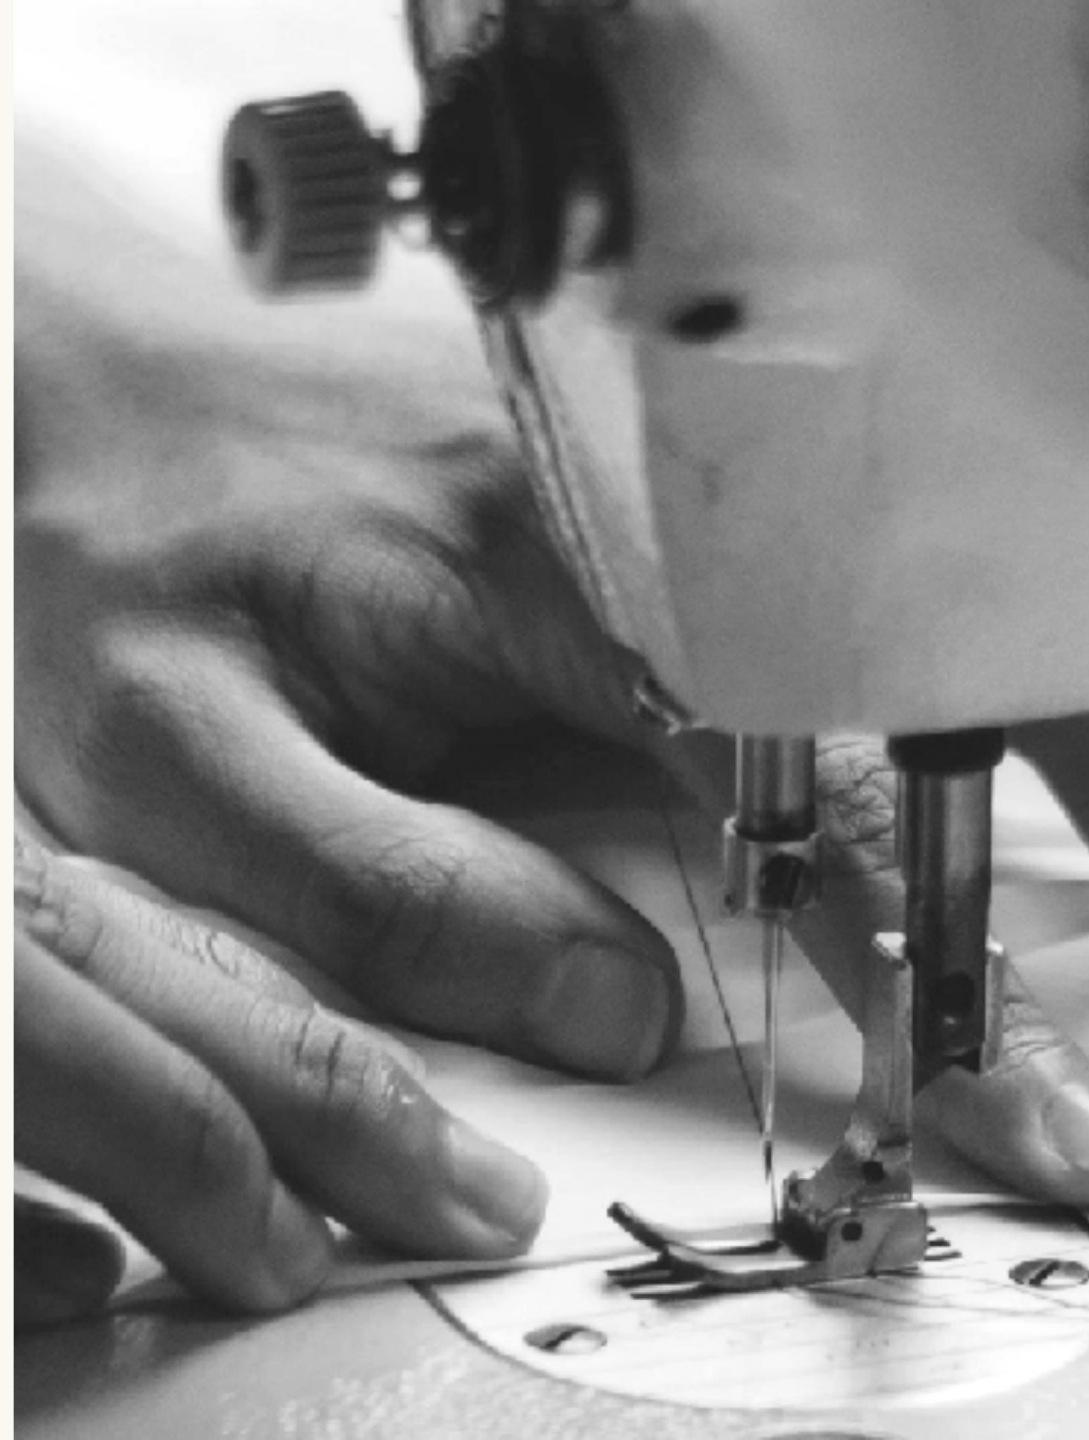

Fast, accurate sampling — fully under our control — before mass production ever begins.

02 Sample Specialists

Dedicated specialists obsess over fit and detail, so the first sample already reflects the final intent.

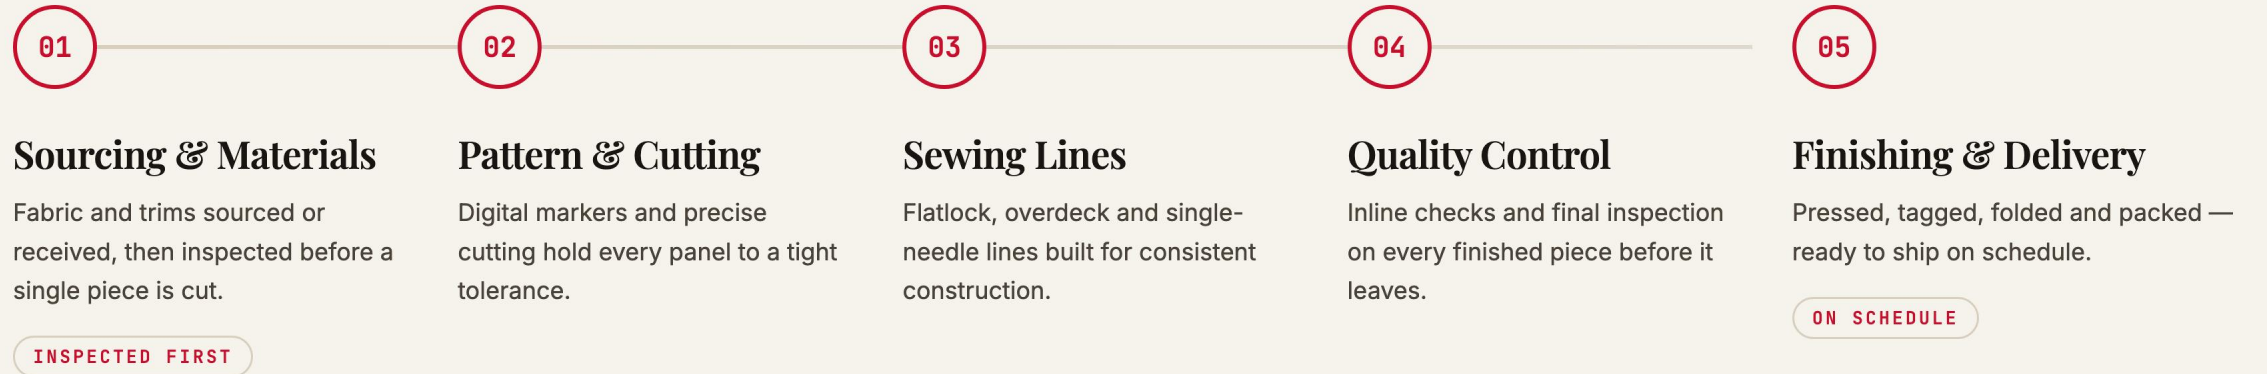

03 A Dedicated MD

A merchandiser for clients keeps you in sync and your order on track — from first sample to final delivery.

From fabric to finished, *under one roof.*

Quality isn't checked at the end — it's built into every stage. One partner controls the full line, start to finish.

05 - OUR VALUE

Adding value to raw materials.

Founded with the goal of adding value to raw materials, we are dedicated to producing high-quality products that are accessible to all.

By offering affordable, top-notch products, we serve both large businesses and individual consumers.

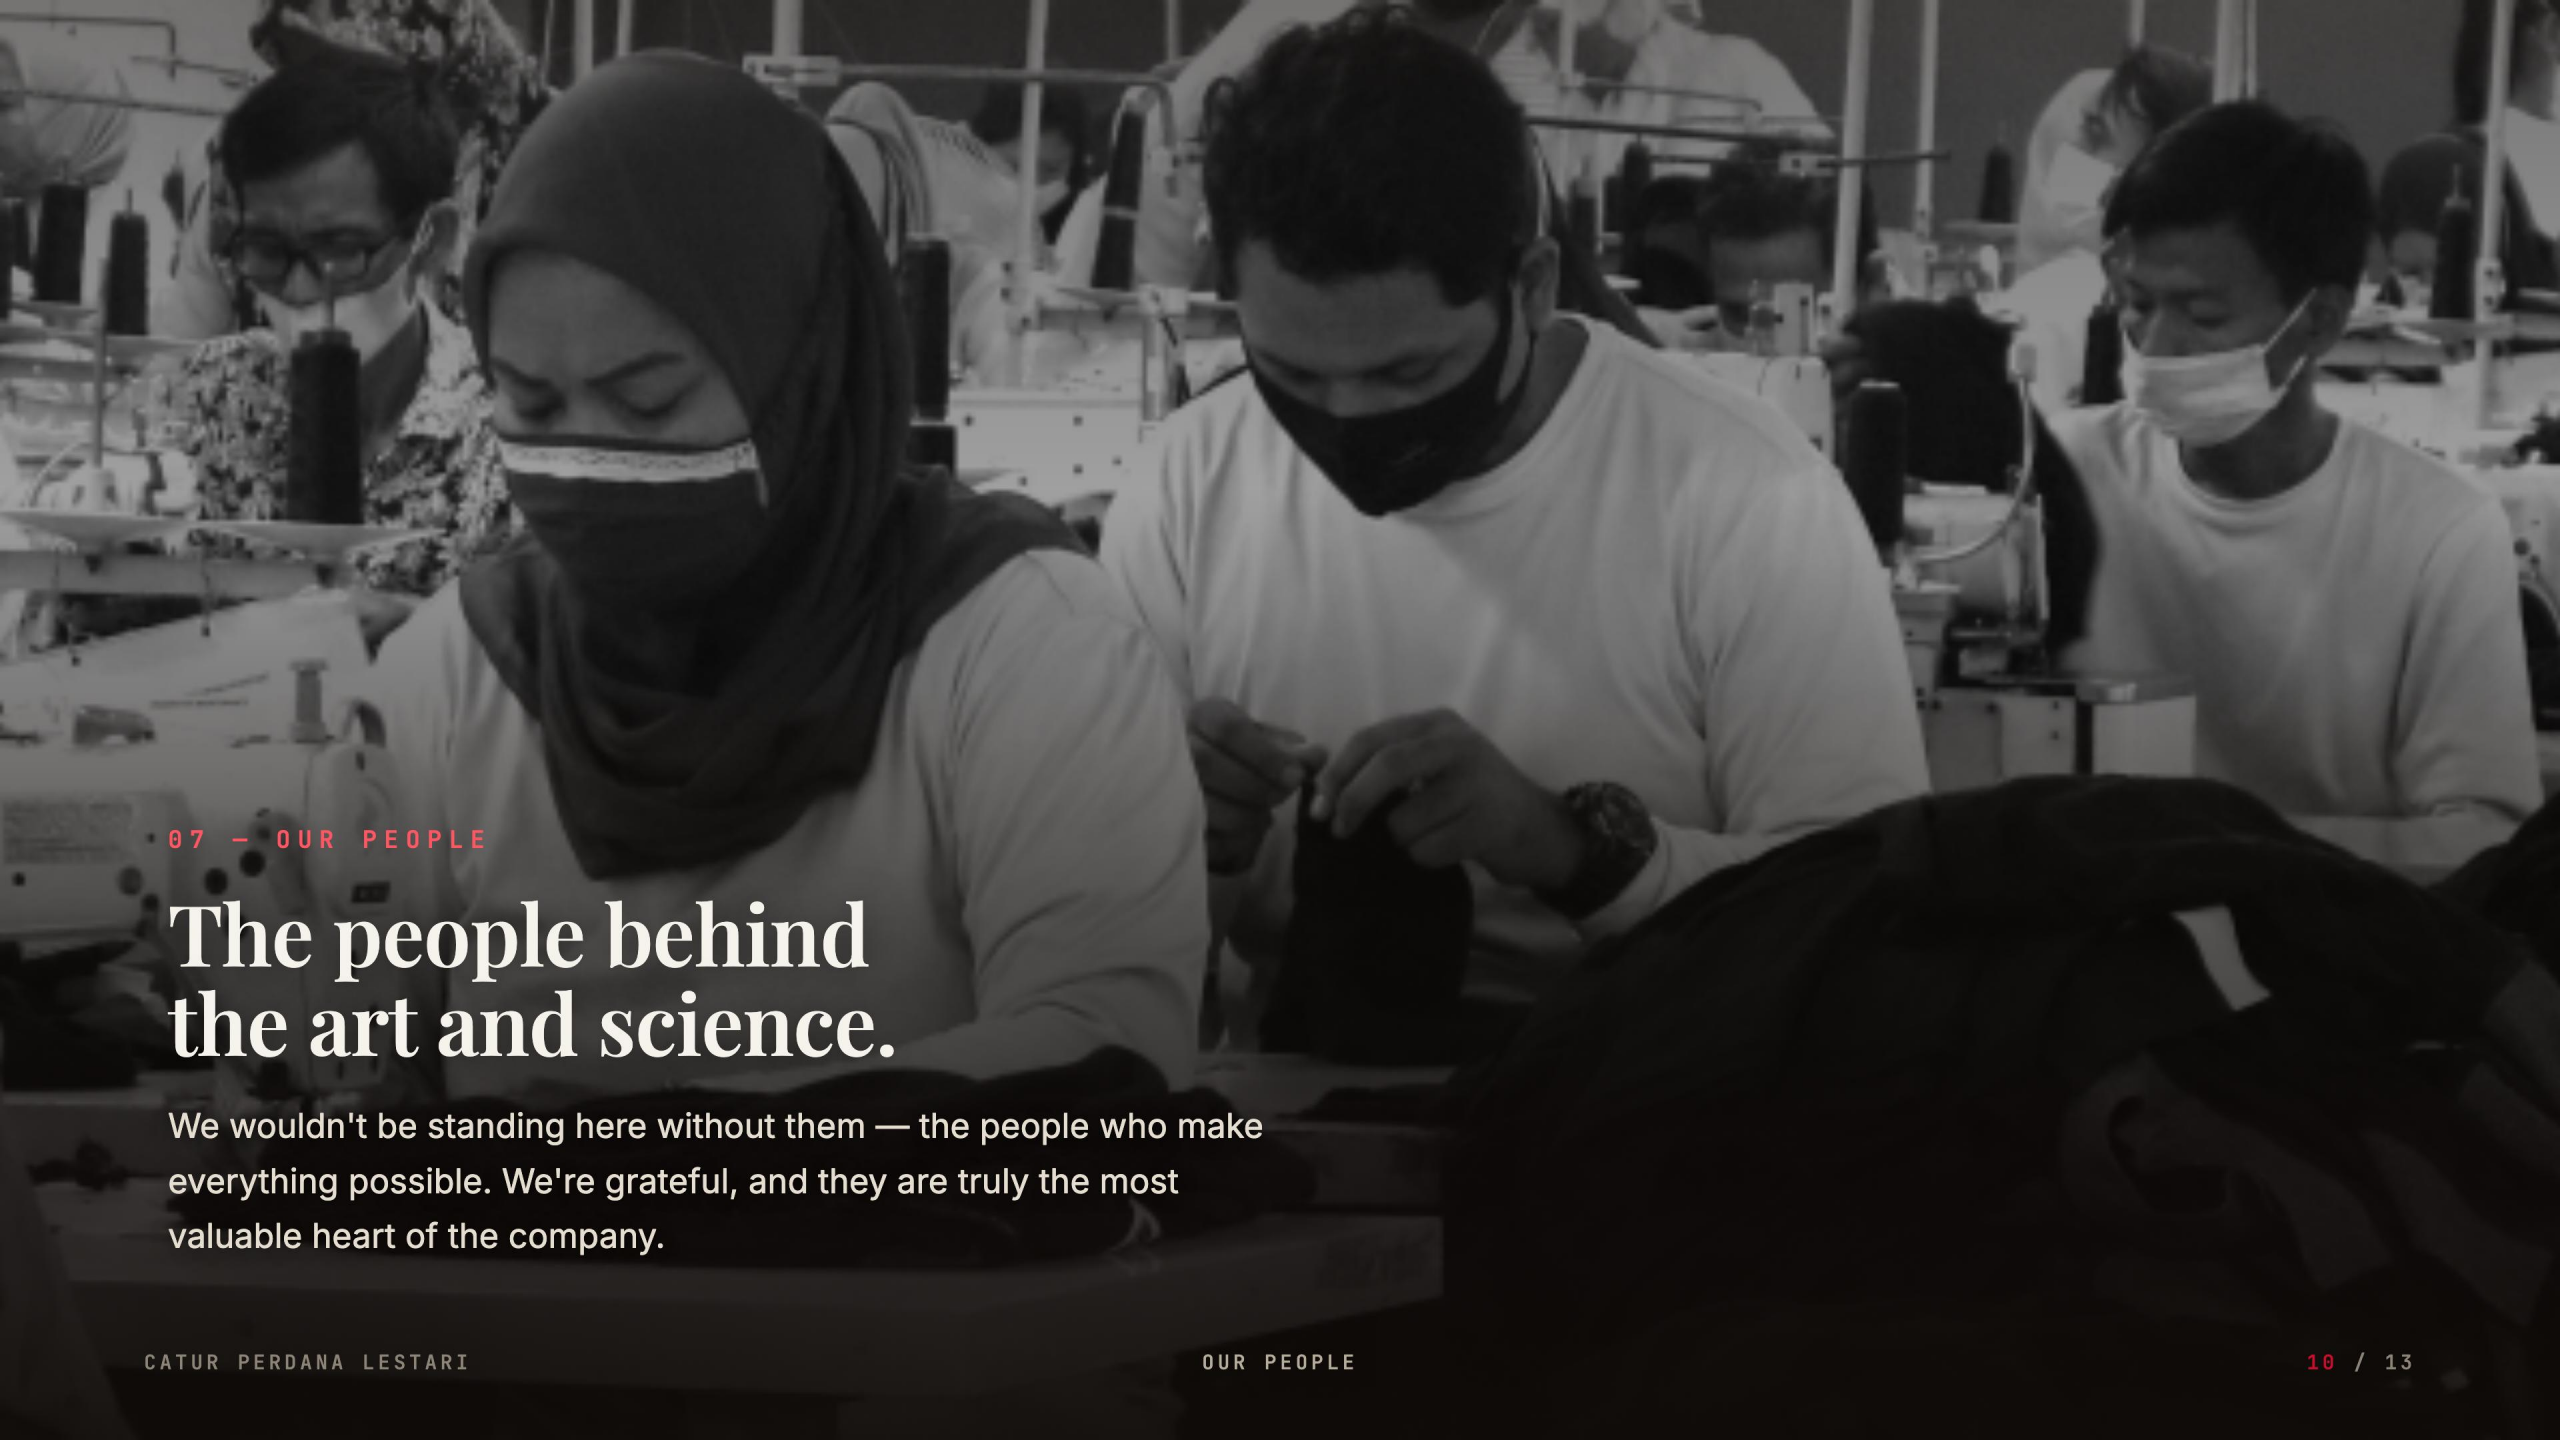

Our ultimate goal is to contribute to a better quality of life for our community.

06 — VISION & MISSION

To become a leading apparel company, known for the highest quality products and services — while consistently *driving innovation.*

OUR MISSION

- 01 Consistently meet and exceed customer expectations with our products.
- 02 Deliver superior products and services that delight our customers.
- 03 Remain at the forefront of fashion through continuous innovation.

07 — OUR PEOPLE

The people behind the art and science.

We wouldn't be standing here without them — the people who make everything possible. We're grateful, and they are truly the most valuable heart of the company.

Trusted by brands
we're proud of.

Three ways to work with us.

CMT.

CUT · MAKE · TRIM

You supply your own material; we handle the cutting, making and trimming — processing it into ready-to-wear garments.

01

FOB.

FREE ON BOARD

Full order buyer — we provide the material as well as the CMT process, while you still customise the cuts and sewing details.

02

TS.

TRADE & SUPPLY

An open-contract partnership to supply garments to your specification — working system and quantity, held to our quality.

03

10 - CONTACT

Let's build it together.
